

8 & 9 NOVEMBRE

Mercredi 8 novembre
de 13h à 17h30

Jeudi 9 novembre
de 8h00 à 17h00

21, Avenue de Paris,
78000 Versailles

Programme du mercredi 8 novembre 2017

13h00 : Café d'accueil

13h15 - 13h30 **Introduction, Luc MARBACH**, Directeur Général de VEDECOM
Féthi BEN OUEZDOU, Directeur Scientifique, General Chair

Session 1: Pedestrian vs Autonomous Vehicles

Detection, Tracking, Physical and Sociological Interactions with Autonomous Vehicles
Chairs : **Guillaume BRESSON & Sami KRAIEM**, chercheurs VEDECOM

13h30 – 14h30 **Pedestrian detection and tracking: new artificial intelligence methods**
Thierry CHATEAU, Professeur à l'Institut Pascal

14h30 – 14h55 Pedestrian detection and behaviors modelling in Urban environment
Dominique VAUFREYDAZ, Maître de Conférences à l'Univ. Grenoble Alpes/Inria/LIG

14h55 – 15h20 Exploring new perspectives of Deep Learning for Pedestrian Detection
Ujjwal, Doctorant au sein de VEDECOM

15h20 – 15h45 Dissociation between sensorimotor & cognitive processes during pedestrian path planning
Halim HICHEUR, Chercheur à l'Université de Fribourg

15h45 – 16h00 : Pause café

16h00 – 16h25 Socio-cognitive dynamics of the street-crossing decision-making in a naturalistic environment
Stéphanie COEUGNET-CHEVRIER, Chercheur au sein de VEDECOM

16h25 – 16h55 “Passant” Figures and Novel Mobilities
Pascal AMPHOUX, Professeur et Architecte à l'ENS d'Architecture de Nantes

16h55 – 17h20 Cooperative Perception and Communication for Protection of Vulnerable Road Users
Pierre MERDRIGNAC, Chercheur au sein de VEDECOM

Programme du jeudi 9 novembre 2017

8h00 : Café d'accueil

Session 2: Big Data and Novel Mobilities

Challenges on Big data collecting, analysis and associated Learning Methods
Chairs: **Bertrand LEROY & Mohamed-Cherif RAHAL**, Chercheurs VEDECOM

8h30 – 9h30 **Introduction to Deep Learning and its applications to Smart Mobility**
Ludovic DENOYER, Professeur à l'UPMC

9h30 – 9h55 Data and Algorithms for Urban mobility
Dominique BARTH, Professeur à l'UVSQ

9h55 – 10h20 Data collecting and processing for autonomous driving applications
Steve PECHBERTI, Chercheur au sein de VEDECOM

10h20 – 10h40 Pause

10h40 – 11h05 Trusted and Secure Communications in a Vehicular Mesh networks
Jun ZHANG, Professeur à Telecom Paris Tech

11h05 – 11h30 Moove - Data modeling obtained from sensor raw data, used in perception algorithms
Gildas THIOLON, Ingénieur de Recherche au sein de VEDECOM

11h30 – 11h55 Mobility analysis in public transport with Smart Card Data
Latifa OUKHELLOU, Directrice de Recherche à l'IFSTTAR

11h55 – 12h20 Legal requirements for personal data protection
Myriam HOEFFLER, Doctorante au sein de VEDECOM

12h30 - 14h : Cocktail déjeunatoire

Session 3: Experimentations

Autonomous Vehicles Experimentation Trends
Chair: **Sébastien GLASER**, Chef de projet Véhicule à Conduite Déléguée VEDECOM

14h00 - 15h00 **Ambarella/VisLab perception technology for Autonomous Driving**
Alberto BROGGI, VisLab General Manager & Professeur à l'Université de Parme

15h00 - 15h10 SMIV'2017 Synthesis and Future
Féthi BEN OUEZDOU, Directeur Scientifique & General Chair

15h10 - 17h00 **VEDECOM Demonstrations**

- **Multi-sensor fusion for obstacle detection and tracking** Emmanuel Doucet, Hatem Hajri, Hoang-Lan Pham
- **Heterogeneous data visualization from autonomous vehicle for perception algorithms design** Gildas Thiolon
- **Cooperative ITS – G5 platform for V2V and V2I Field Tests** Mattia Minelli
- **Wizard of Oz vehicle : a mobile laboratory for automated driving studies** Mercedes Bueno Garcia, Ebru Dogan
- **Optimal use of connected and automated demand-responsive transit** Wilco Burghout, Nadège Faul
- **ALTAÏR project, a machine learning approach for human mobility inference** Guilhem Sanmarty, Sami Kraiem
